Getting Hired Online 101: Portfolios

Pointers to help you zoom through the virtual hiring process

Comprehensively displaying your work can make or break your hiring journey. Whether it's writing and design samples, events you've planned, or coding examples, companies want to know about your skills. Here are some tips for showing your work creatively:

1. Use Sway for sleek visual portfolios. With <u>Sway</u>, create multimedia cards, and Sway generates your portfolio for you. Choose from many templates, styles, and fonts to make your Sway portfolio unique. An added plus is that there are tons of free stock images, video, and audio files to spruce up your presentation.

2. Go more in depth with a personal website. With a personal website, you can show more details about you, past work experiences, fun facts, and galleries of your work. If you're a current student, you can <u>publish your own</u> website through Pitt at no cost! There are several free or low-cost web hosting sites that alumni can explore.

3. Create a variety of great samples. Having quality samples is key! To create more samples to show future

employers, use the <u>Pitt IT Virtual Computing Lab</u>. The Virtual Lab gives you access to professional coding and design programs to create works that will give your portfolio a big-time boost.

4. Use OneDrive to store your samples. Different samples, cover letters, and resumes are great for different jobs. Stay organized and store all of your documents in your free cloud storage on <u>OneDrive</u>. That will make it easy to switch out samples and tailor your application for each employer.

TECH TIP

Virtual Walk-In Support Is Here

Connect with a Technical Consultant through Zoom.

With the University's transition to remote operations, Pitt IT is pleased to offer Virtual Walk-In Support. From setting up a new computer or tablet with Pitt resources, to trouble-shooting a thorny issue, get the same familiar service—via Zoom—that you're accustomed to at the Walk-In Support Desks on campus.

The Virtual Walk-In Support Desk is open now and will continue to be available after we return to campus! It is open Monday-Friday, 8 a.m.-6 p.m. and Saturday, 8 a.m.-4 p.m.

To get started, go to pi.tt/virtualsupport:

- 1. You will be greeted in the Zoom waiting room
- 2. You will then be placed into a breakout room with a technical consultant.
- 3. Discuss your issue live and share your screen. If desired, grant remote access of your device so the

consultant can make changes to your system.

PITT IT NEWS TO KNOW

Stay Protected - Replace Your Antivirus Software

Pitt's License for Symantec Endpoint Protection Ends June 13.

Pitt has opted not to renew licensing for Symantec Endpoint Protection antivirus software. Instead, Pitt IT recommends either <u>Malwarebytes Premium for Mac</u> or **Microsoft Defender Antivirus**, which is built-in to the <u>Windows 10</u> and Windows 8.1/8 operating systems. Both solutions are excellent antivirus products, and Microsoft Defender is optimized for use with Office 365 desktop/cloud apps. *Pitt IT provides both products to students at no cost.*

This change was implemented to avoid an unplanned and significant increase in Symantec licensing fees. Symantec will stop providing virus definitions and security updates after the University's license expires on June 13. Because other antivirus software may not function with Symantec installed, please remove Pitt-licensed Symantec software and install an alternative program on your personal devices using these <u>step-by-step instructions</u>
